## Dry Ice Cleaning Equipment

This catalog contains Cold Jet’s Aero<sub>2</sub> product offerings and part numbers that were current at the time of catalog production. An item’s display in this catalog does not guarantee the item’s availability at any time in the future. Images shown are for representative purposes only. Products may vary from the images displayed. Cold Jet will always ship the latest version of an available part, part numbers may vary, and invoices will always reflect the latest revision numbers. Cold Jet is not liable for typographical errors or changes to specifications presented. Check [www.coldjet.com](http://www.coldjet.com) for the most recent version of this document. Contact your Cold Jet representative for the most current information.

### Notes

- Aero<sub>2</sub> dry ice cleaning systems use High Density 3 mm dry ice pellets
- Air consumption depends on the blasting pressure
- Air consumption data listed for all parts are approximate and without guarantee
- Blasting pressure can differ from the operating pressure and can vary during use
- For technical questions, please consult Cold Jet application engineers

# EXPERIENCE

## Performance Applicators

- Two-step safety trigger
- Clearly identified blasting controls and visible LED's let your team know when the system is ready for use
- Sealed electrical switches, tough outer shell and designed water release channels protect against moisture, grit and drop damage
- Two built-in, industrial grade lights illuminate your surface, allowing you to cover the most area
- Research-driven development of ergonomic handle and trigger design with proper weight distribution makes this a comfortable applicator

# EXPERIENCE

## Flexibility - 12FT and 20FT Blast Hoses

- Cold Jet's lightest and most flexible blast hoses, starting at less than 10 lbs or 4.5 kg
- Keep your hoses cleaner and lighter with an outer wrap that repels moisture and easily wipes down after use
- Hybrid hoses for durability and flexibility
- 12ft (3.6m) for PCS 60 only and 20ft (6.1m) for PCS 60 and PLT 60

# EXPERIENCE

## Precision Kits (PCS 60 only)

- You can now maximize the best ergonomic experience by adding the light-weight MicroClean Precision accessories to your pellet systems and blast in hard to reach areas traditional systems could not
- Two-step safety trigger
- Clearly identified blasting controls and a visible LED let your team know when the system is ready for use
- Sealed electrical switches
- Tough outer shell and designed water release channels protect against moisture, grit and drop damage
- Two built-in industrial grade lights illuminate your surface
- Research-driven development of ergonomic handle and trigger design with proper weight distribution makes this a comfortable applicator

# EXPERIENCE

## SureFlow Quick Disconnect Fittings

- Save time by quickly connecting your blast hoses with ultra light quick disconnect fittings
- Fittings are aerodynamically customized to ensure full particle flow through the fitting, maintaining particle integrity for maximum performance
- Cold Jet SureFlow Quick Disconnect fittings are removable, so the end user can continue to use them on replacement hoses

# Nozzles

Cold Jet's advanced and patented line of nozzles are designed to maximize performance whatever the application. Broad or precise cleaning, hard to reach areas or working in a confined space, our line of nozzles will exceed your expectations. Recommended operating parameters are shown in the tables for each nozzle. Recommended accessory handle is noted where applicable.

## Low and Standard Flow Nozzles
