

 DRY ICE BLASTING + ABRASIVE

E-CO₂® 150

REVOLUTIONIZING INDUSTRIAL
SURFACE PREPARATION

POT CAPACITY

150 lbs (68 kg)

DIMENSIONS

Length x Width x Height:

24 in (61 cm) x 21 in (53 cm) x 39 in (99 cm)

WEIGHT

135 lbs (61 kg)

**+ Combine with the Cold Jet C100,
Aero 80FP or the Aero2 PLT 60**

The E-CO₂ 150, a custom 1.5 cubic feet pressurized abrasive pot, can be paired with a compatible Cold Jet dry ice blaster (PLT 60, Aero 80 or C100). The system has been developed specifically to feed Cold Jet's proprietary mix of dry ice and an abrasive medium.

The system is designed to enable accurate dosing of abrasive material, self-regulating capabilities and integration of applicator control mechanisms to ensure dry ice and the abrasive feed together simultaneously when the trigger is pulled.

Cold Jet's blasters feature the patented SureFlow System, which ensures a full 150 lb load can be run through the system without the risk of clogging, ensuring that the E-CO₂ 150 will maintain a pulse-free blast stream that cleans uniformly on every pass.

With automated hopper agitation and the ability to operate with long lengths of hose, the E-CO₂ 150 will enable cleaning in locations never before possible.

Compliant with the EU Machinery Directive (CE)
and UL Design Standards
